Salient Features :

Efficient hydraulic system for increased productivity :

Three pump hydraulic system with independent closed loop swing function not only assures smooth compound work equipment movements and travel but also shortens the cycle time

Powerful economical motor :

2x6.6 kV, 4 pole, 3 phase, 50 Hz TEFV squirrel cage induction motors delivers 2 x 300 kW to assure high operational economy.

Effort free operation :

Work equipment controls are simple and light touch due to the hydraulically assisted control system.

Maximum working performance :

Wide working range and large undercarriage assure stable operation for maximum working performance.

Easy maintenance :

Centralised monitoring systems within the operator's cab allows fast daily checks and also keeps the operator constantly informed of any abnormality during operation.

Operator comfort :

Specially designed cab provides plenty of work space and excellent visibility.

Minimum Downtime : Automatic lubrication system supplies optimum amount of grease to vital hinge pins and swing circle bearings reducing failures and downtime.

Safety :

Automatic fire detection and suppression system prevents fire accidents and hence minimizes loss of valuable resources.

MOTOR

Type	: Squirrel cage Induction motor
Out put	: 2 x 300 kW
Voltage	: 6.6 kV +/- 10%
Rated current	: 33 A each (at 6.6 kV)
Frequency	: 50 Hz
Revolutions	: 1,500 rpm
Starting current	: 4.5 p.u (approx.)
• Custom made electric motor to withstand severe mining conditions. • Power limit control by Pump Management System • Note: The hydraulic specification of the electric-driven machine varies from the diesel driven version.	

HYDRAULIC SYSTEM

Unique four pump system and independent swing function assure smooth compound movements of the work equipment. Unique positive flow control system controls all pumps for efficient use of motor power. This system also reduces hydraulic loss during operation, resulting in low power consumption. Oil to air hydraulic oil cooler maintains optimum heat balance of the hydraulic oil.

Hydraulic pumps

Four variable-capacity piston pumps power the boom, arm, bucket and travel circuits.

Capacity (discharge flow) at motor revolutions : 4 x 410 l/min

Two variable capacity piston pumps power the swing circuit.

Capacity (discharge flow) at motor revolutions : 2 x 358 l/min

Hydraulic Motors :

Travel : Four axial piston motors with brake valve (Two for each track)

Swing : Two axial piston motors with swing holding brake.

Control Valves : Eight way spool type x 2

Relief valve settings

Implement circuits	: 31.4 MPa (320 kg/cm ²)
Travel circuits	: 31.4 MPa (320 kg/cm ²)
Swing circuits	: 31.4 MPa (320 kg/cm ²)
Pilot circuits	: 3.43 MPa (35 kg/cm ²)

Hydraulic cylinders (Backhoe) :

Cylinder	Number	Bore x Stroke
Boom	2	280 mm x 2660 mm
Arm	2	250 mm x 2180 mm
Bucket	2	200 mm x 2170 mm

Hydraulic cylinders (Loading shovel) :

Cylinder	Number	Bore x Stroke
Boom	2	280 mm x 2110 mm
Arm	2	225 mm x 1830 mm
Bucket	2	225 mm x 1870 mm
Bottom dump	2	180 mm x 460 mm

STEERING

Steering / travel controls are actuated with either hand levers or foot pedals. Pushing both levers (or pedals) makes the machine to move forward. Pulling them back makes the machine to move backward. Setting one lever (or pedal) in neutral and the other in forward enables the machine to make a pivot turn. Pushing one forward while pulling the other backward makes the machine counter-rotate on the spot.

DRIVES

Fully hydrostatic drive system. Each track is driven by two hydraulic motors. Power is transmitted through spur gears and planetary reduction gears to the track.

Max. drawbar pull : 1030 kN (105000 kg)

Max. travel speed : 0.75 m/s (2.7 km/h)

STANDARD ACCESSORIES

Two modes selection, Fully hydrostatic drive, Track roller guards, Travel motor guards, Wet disc type parking brake, Swing holding brake, Hydraulic idler cushion (HIC), Vandalism cap, Segmented sprocket, Tool box, Electronic monitoring panel. All steel High mount cab includes tinted glass windows, reclining seat, magazine box, ash tray, rubber mat, rear view mirror, cabin fan, wind shield wiper, portable fire extinguisher and room lamp. Counter weight, Automatic lubrication system, Hydraulically operated Auto Lubrication system, Wind shield washer, Front wind shield guard.

OPTIONAL ACCESSORIES

Heater, Air conditioner, Falling Object Protective Structure (FOPS), Track shoe (1010 mm).

BRAKES

Hydraulic lock type brakes. Each travel motor is equipped with a brake valve. When the travel / steering levers are positioned in neutral, the brake is automatically applied. When the brakes are applied, the brake valve softens shocks and also serves to regulate speeds when making descent. Oil, multiple-disc type parking brakes, which are hydraulically interconnected with travel / steering levers, are also automatically actuated on the final-drive shaft.

SWING SYSTEM

Two piston motors power the swing system through swing machineries with spur and planetary reduction gears. The wet disc type swing holding brake is automatically applied when the control lever is positioned in neutral. Single-row shear type ball bearings with induction-hardened internal gears are built-in in the swing circle.

Swing speed : 4.5 r/min
Tail Swing radius : 6000 mm

UNDER CARRIAGE

Job-proven undercarriage with long track and wide track gauge. Center frame is mounted on the track frames and secured with bolts. Variable track gauge. Sealed tracks. Lubricated rollers and idlers. Hydraulic track tension adjusters with a cushion cylinder. Assembled track-type tractor shoes with double grousers.

Shoe width : 810 mm
Grouser height : 23 mm
No. of shoes (each side) : 49
No. of track rollers (each side) : 8
No. of carrier rollers (each side) : 3
Ground pressure (Backhoe) : 162 kPa (1.65 kg/cm²)
